# Delphiniums

**Finest Strains from Best American and English Specialists**

In building up my strain, nothing has been too good to help in supplying the foundation. Noted growers in Oregon, Colorado, California, and New York States have contributed their share, the best America has to offer. From England, at long prices, has come the celebrated Wrexham, B. & L., and Kelway strains. From these I have selected my seed plants bearing massive flowers in all shades of blue with some wonderful orchid colorings and many with rose centers.

**I do not offer plants from any separate strain as these are in my stock rows**, but I am selling seedling plants from this selected stock in one- and two-year roots at very moderate prices.

**Strong, 1-year, transplanted roots, 25c, doz ..... \$ 2.50**

**Heavy, 2-year clumps, effective this year, 50c, dozen ..... 5.00**

**One hundred strong roots ..... 20.00**

## Delphinium Seed

Early fall delivery (August to October)

**I will sell a limited quantity of seed from my own selected stock plants, in packets of 100 seeds or more, at ..... 50c**

**Seed from run of the field, hand-picked, thoroughly mature, 90 per cent germination, packet ..... 25c**

**One ounce, sufficient to produce 1 to 2,000 plants ..... \$2.00**

Delphinium seed should be planted outside as early in fall as possible, and left in the frame or seed bed till of a size to handle easily for transplanting in spring. A good percentage will bloom the first season.

"I have no named varieties and none for sale other than as offered above."

My customers write me that they easily captured the Delphinium prizes at their shows.

See back of this sheet for other spring offers.
